EDUCATION

Texas A&M University   **College Station, TX**
Junior Computer Science Undergraduate   Cumulative GPA: 3.83

WORK EXPERIENCE

Summer In The Zone   **Carrollton, TX**
Assistant Teacher   Summers 2018 - 2022
- Summer In The Zone was a program run by my high school that took care of kids while their parents worked. I helped plan, coordinate, and execute field trips that would be fun for the kids. Day to day I would help the lead teachers with whatever they needed done. This involved moving furniture from room to room, getting snacks for the kids, and setting up any in school activities like movie day or water day.

PourThat   **Southlake, TX**
Implementation Intern   May 16, 2024 - Present
- PourThat is a company developing an app that will drastically change how customers will be able to order drinks from bars and restaurants. I will communicate with bar managers individually in order to set them up for success in using the app as well as ensure continual support after they start. I will also collaborate with a team in order to troubleshoot any errors within the app that are found by users. This is my first step into the computer science field, so I will learn a lot from it.

INVOLVEMENT

National Honors Society	March 2020 - May 2022
Young Men's Service League	Sept 2018 - April 2022
Boy Scouts	Aug 2016 - June 2021
High School eSports	Aug 2020 - Dec 2021
Phi Eta Sigma	April 2023 - Present
Tournament Organizer for College Station Smash Ultimate	Sept 2022 - Present

ACHIEVEMENTS

Eagle Scout   **June 3, 2021**
- Becoming an Eagle Scout taught me a lot about leadership, communication, and dedication. After meeting with my school's headmaster, we decided that building a gaga ball pit for the lower school would be the best choice for my project. A lot of preparation work was required before the day of the project, so during that time I organized the project day's schedule and contacted people in order to get all of the supplies I needed. On the day of the project, I demonstrated how to use all of the tools required to those helping me. If they ever needed help, I would assist them and make sure they were on the right track. The project took two days to finish, and the satisfaction I felt when it was complete was immeasurable.

SKILLS & INTERESTS

- **Coding Languages:** Python, C++
- **Hobbies:** Coding, Rock Climbing, Video Games, Guitar
